WARNING – Combustible liquid
TOXIC - Keep out of reach of children
ECOTOXIC

Chlorpyrifos
500EC

Active Ingredient: 500g/litre chlorpyrifos in the form of an emulsifiable concentrate
Agricultural and horticultural insecticide

Net: 20 Litre
Chlorpyrifos 500EC

Record Keeping: Records of use as described in NZS 9408 Management of Agricultural Pesticides should be kept for at least 2 years.

Packing Group: LIQUID, TOXIC, ORGANOPHOSPHORUS

REGISTRATION DATA

Agrichemicals. Do not store with Class 1, 2, 3.2, 4 or 5 substances. Store in a dark, cool, dry area, in a closed, in a locked, dry, cool area, away from sources of ignition and they are likely to be visited by bees.

Do not store in a stage of its life cycle.

Shelf Life: For use up to 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

Resistance Management: Resistance to this product may develop from excessive use. To minimize this risk, use this product in accordance with the label instructions and resistance management strategies that exist for any insect pest listed on the label. Avoid using this insecticide exclusively at one location and avoid continuous or repetitive spraying. Maintain good cultural practices.

DIRECTIONS FOR USE:
The rates suggested for orchard crops are for high volume spraying to runoff. For concentrate application, adjust dilution to the specified rates. Amend the application volume to ensure full spray coverage. Apply pre-flowering, at complete bud (2 to 3 weeks before flowering) and mid and late season. Complete spraying of vine trunks, leaves and berries is essential for greenfly control. The addition of a non-ionic wetting agent is recommended.

Grapes (except white grape): Mealy bug, mealy scale crawlers. Use 50-75ml/100 litres of water. Use the higher rate for mealy bug control or under severe infestation. Apply at bud (mid-vegetative) stage, pre-flowering, post-flowering and 14 days later, then every 21 days until veraison.

Plum and Stonefruit: Mealy bug, scale crawlers, whitefly. Use 50-100ml/100 litres of water. Thorough complete coverage. For superior application, use a suitable wetting agent. For concentrate application at or after bud movement with a suitable compatible oil. Apply the concentrate at or after bud movement with a suitable compatible oil. Use 500ml in 100 litres of water per hectare for general application, or 10-20 litres of water per hectare for aerial application. Botanicals: Apply 2.5-7.5 litres in 200-500 litres of water per hectare. Use 250-500 litres in 10-20 litres of water per hectare for general application, or 10-20 litres of water per hectare for aerial application. Use 2 workers per hectare or 1 operator and 1 sprayer. Use 500ml in 50-150 litres of water per hectare for general application, or 10-20 litres of water per hectare for aerial application. Botanicals: Apply 2.5-7.5 litres in 200-500 litres of water per hectare.

Risk Group: Agriculture-land use. Chlorpyrifos 500EC is compatible with most materials such as Bordeaux mixture and lime sulphur.

Compatibility: Chlorpyrifos 500EC is compatible with most compatible materials in use. It is compatible with highly alkaline materials such as Bordeaux mixture and lime sulphur.

Non-ionic wetting agents are recommended for mixing or applying wear full protective clothing such as impervious gloves, eye protection, respirator, waterproof hat, coat and trousers and repeat just before blossom. Complete wetting of vine trunks, leaves and berries is essential for greenfly control. The addition of a non-ionic wetting agent is recommended.

For aerial application, use 1.7 litres/ha in at least 50 litres/ha water. Use the higher rate for mealy bug control or when insect pressure is high. Apply at bud (mid-vegetative) stage, pre-flowering, post-flowering and 14 days later, then every 21 days until veraison.
