Crop Care

Stroby® WG

FUNGICIDE

ACTIVE CONSTITUENT: 500 g/kg KRESOXIM-METHYL

GROUP K FUNGICIDE

For the control of Black Spot (Scab) and Powdery Mildew in Apples and Scab in Pears.

IMPORTANT: READ THE ATTACHED LEAFLET BEFORE USE

NET CONTENTS: 200 g

Crop Care Australasia Pty Ltd
ACN 061 362 347
Unit 15/16 Metroplex Avenue
Murarrie Qld 4172
Tel: (07) 3909 2017
STORAGE AND DISPOSAL
KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. Dispose of at a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

SAFETY DIRECTIONS
When preparing spray wear elbow-length PVC gloves. After each day’s use, wash gloves.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

MATERIAL SAFETY DATA SHEET
Additional information is listed in the Material Safety Data Sheet.

Conditions of sale
Crop Care Australasia Pty Ltd will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply or use of these goods other than responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by Statutes applicable to the sale or supply of these goods. To the extent allowed by such Statutes the liability of Crop Care Australasia Pty Ltd is limited to the replacement of the goods or (at the option of Crop Care Australasia Pty Ltd) the refund of the price paid and is conditional upon a claim being made in writing and where possible sufficient part of the goods to enable proper examination being returned to Crop Care Australasia Pty Ltd within thirty days of delivery.

</table>

DO NOT use in equipment that requires concentrations greater than 50g STROBY/100 L water (5x concentration), as crop safety has not been assessed at these concentrations.

Ensure thorough and even coverage of all plant parts.

May be used with the recommended rate of a non-ionic wetting agent.

The use of STROBY is subject to a CropLife Fungicide Resistance Management Strategy. DO NOT apply more than three applications of STROBY or other Group K fungicides per season. Refer to Resistance Management Strategy in General Instructions for further details.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIODS
APPLES, PEARS: DO NOT HARVEST FOR 6 WEEKS AFTER APPLICATION.
DO NOT GRAZ UNDER OR SURROUNDING TREATED TREES, OR CUT FOR STOCK FOOD, FOR 2 WEEKS AFTER APPLICATION.

GENERAL INSTRUCTIONS

FUNGICIDE RESISTANCE WARNING
STROBY is a member of the strobilurin group of fungicides. For fungicide resistance management STROBY is a Group K fungicide. Some naturally occurring individual fungi resistant to STROBY and other Group K fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly. These resistant fungi will not be controlled by STROBY or other Group K fungicides, thus resulting in a reduction in efficacy and possible yield loss.

Since the occurrence of resistant fungi is difficult to detect prior to use, Crop Care Australasia Pty Ltd accepts no liability for any losses that may result from the failure of STROBY to control resistant fungi.

RESISTANCE MANAGEMENT STRATEGY
To prevent or delay the onset of resistance, do NOT apply more than three sprays per season of STROBY or other Group K fungicides. If consecutive applications of Group K fungicides are used, then they must be followed by at least the same number of applications of fungicide(s) from a different group(s) before a Group K fungicide is used again, either in the current or following season.
INTEGRATED PEST MANAGEMENT
STROBY is suitable for use in Integrated Pest Management (IPM) programs.

EXPORT OF TREATED FRUIT
Growers should note that MRLs or import tolerances do not exist in all markets for fruit treated with STROBY. If you are growing fruit for export, please check with Crop Care Australasia Pty Ltd for the latest information on MRLs and import tolerances BEFORE using STROBY.

EQUIPMENT
**Ground Application:** STROBY can be applied with high volume (dilute) or low volume (concentrate) orchard spraying equipment that is fitted with mechanical or hydraulic agitation. Equipment should produce a fine, uniform spray coverage of all plant surfaces (stems, leaves and fruit).

**Aerial Application:** Do NOT apply by aircraft.

MIXING
Add the required amount of STROBY directly to the half filled spray vat with agitators in motion. Complete the filling of spray vat under constant agitation. Do NOT allow the spray mixture to remain in the tank for long periods without agitation.

APPLICATION
**Dilute Spraying**
- Use a sprayer designed to apply high volumes of water up to the point of run-off and matched to the crop being sprayed.
- Set up and operate the sprayer to achieve even coverage throughout the crop canopy. Apply sufficient water to cover the crop to the point of run-off. Avoid excessive run-off.
- The required water volume may be determined by applying different test volumes, using different settings on the sprayer, from industry guidelines or expert advice.
- Add the amount of product specified in the Directions for Use table for each 100 L of water. Spray to the point of run-off.
- The required dilute spray volume will change and the sprayer set up and operation may also need to be changed, as the crop grows.

**Concentrate Spraying**
- Use a sprayer designed and set up for concentrate spraying (that is a sprayer which applies water volumes less than those required to reach the point of run-off) and matched to the crop being sprayed.
- Set up and operate the sprayer to achieve even coverage throughout the crop canopy using your chosen water volume.
- Determine an appropriate dilute spray volume (See *Dilute Spraying* above) for the crop canopy. This is needed to calculate the concentrate mixing rate.
- The mixing rate for concentrate spraying can then be calculated in the following way:

  **EXAMPLE ONLY**
  1. Dilute spray volume as determined above: For example 1500 L/ha
  2. Your chosen concentrate spray volume: For example 500 L/ha
  3. The concentration factor in this example is: 3 X (i.e. 1500 L ÷ 500 L = 3)
  4. If the dilute label rate is 10 g/100 L, then the concentrate rate becomes 3 x 10, that is 30 g/100 L of concentrate spray.

- The chosen spray volume, amount of product per 100 L of water, and the sprayer set up and operation may need to be changed as the crop grows.
- For further information on concentrate spraying, users are advised to consult relevant industry guidelines, undertake appropriate competency training and follow industry Best Practices.
COMPATIBILITY
STROBY is compatible with Acaban™, carbaryl 500, Gusathion™ SC, Insegar™, Klartan™, Lorsban™ 250 WP, Mimic™ 700 WP, Pyranica™, Endosan™ EC and Thiodan™ EC. For information on compatibility with other products please contact your local reseller or Crop Care Australasia Pty Ltd representative.

Do NOT mix with Omite™, Betomite™ or products giving an alkaline reaction eg. Bordeaux mixtures or lime sulphur.

RAINFALL
STROBY exhibits good rainfastness once spray has dried on the tree, however its protectant cover may be reduced after 50-60 mm of rainfall.

PRECAUTION
Re-entry Period
Avoid entering treated areas until spray deposits have dried. When prior entry and handling of treated surfaces is necessary wear rubber gloves.

PROTECTION OF LIVESTOCK
STROBY presents a low hazard to bees and can be applied to crop at any time.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
HIGHLY TOXIC TO AQUATIC ORGANISMS.
DO NOT apply if heavy rains are imminent.
DO NOT contaminate streams, rivers or waterways with this product or used container.

DRIFT WARNING
DO NOT apply under weather conditions or from spraying equipment, which could be expected to cause spray to drift onto adjacent crops, crop lands, pasture or livestock.

STORAGE AND DISPOSAL
KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight.
Rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. Dispose of at a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

SAFETY DIRECTIONS
When preparing spray wear elbow-length PVC gloves. After each day’s use, wash gloves.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

MATERIAL SAFETY DATA SHEET
Additional information is listed in the Material Safety Data Sheet.
