Nufarm
Amitrole T
Herbicide

ACTIVE CONSTITUENTS: 250 g/L AMITROLE
220 g/L AMMONIUM THIOCYANATE

GROUP Q HERBICIDE

For the control of weeds in orchards, vineyards, irrigation ditches and drains, eucalyptus and pine plantations, roadsides, pre-plant wheat and barley, and for general industrial situations.

READ COMPLETE DIRECTIONS FOR USE BEFORE USING THIS PRODUCT.

nufarm.com.au
APVMA Approval No.: 31236/51796

ACTIVE CONSTITUENTS:
- 250 g/L AMITROLE
- 220 g/L AMMONIUM THIOCYANATE

For the control of weeds in orchards, vineyards, irrigation ditches and drains, eucalyptus and pine plantations, roadsides, pre-plant wheat and barley, and for general industrial situations.

READ COMPLETE DIRECTIONS FOR USE BEFORE USING THIS PRODUCT.

DIRECTIONS FOR USE

DO NOT apply if rain is expected within 6 hours of application.

<thead>
<tr>
<th>CROP USE OR SITUATION</th>
<th>WEEDS CONTROLLED</th>
<th>WEED STAGE</th>
<th>RATE</th>
<th>CRITICAL COMMENTS</th>
</tr>
</thead>
</table>
| Weed control prior to Crop or Pasture Establishment | Annual ryegrass, Lolium rigidum, Wild oats Avena spp | 2-3 leaf, to 5cm high; 3-6 leaf, to 10cm high | 2.8L/ha; 5.6L/ha  | Good coverage is essential for optimum weed control.  
Pre-planting:  
Cereals can be sown immediately after application. Sow cereal seed at least 5cm deep.  
Canola can be sown immediately after application of the 2.8L/ha rate. Delay seeding until 5 days after application of the 5.6L/ha rate.  
Sub clover, medic and lucerne - delay seeding until 5 days after application.  
Winter pulses: Faba beans, Field peas and lupins can be sown a minimum of 2 days after application at an application rate of 2.8L/ha. Delay seeding until 5 days after application of 5.6L/ha. Use seeding equipment that results in minimal soil disturbance but which removes treated soil from above the seeding row. A seeder fitted with knifepoints and press wheels is preferred. Disc seeders are not preferred because treated soil throw may be inadequate.  
Bleaching of isolated crop leaves may be seen after emergence but this is usually scattered and does not affect overall crop vigour. Light sandy soils and/or heavy rain falling soon after application may increase the likelihood of bleaching happening. |
| Winter Crops                              | Volunteer canola (Brassica napus) including Roundup Ready®-varieties | 4 leaf; 6 leaf   | 2.8L/ha; 5.6L/ha | Good coverage is essential for optimum weed control.  
Pre-planting:  
Cereals can be sown immediately after application. Sow cereal seed at least 5cm deep.  
Canola can be sown immediately after application of the 2.8L/ha rate. Delay seeding until 5 days after application of the 5.6L/ha rate.  
Sub clover, medic and lucerne - delay seeding until 5 days after application.  
Winter pulses: Faba beans, Field peas and lupins can be sown a minimum of 2 days after application at an application rate of 2.8L/ha. Delay seeding until 5 days after application of 5.6L/ha. Use seeding equipment that results in minimal soil disturbance but which removes treated soil from above the seeding row. A seeder fitted with knifepoints and press wheels is preferred. Disc seeders are not preferred because treated soil throw may be inadequate.  
Bleaching of isolated crop leaves may be seen after emergence but this is usually scattered and does not affect overall crop vigour. Light sandy soils and/or heavy rain falling soon after application may increase the likelihood of bleaching happening. |
| Fallow Establishment and Maintenance and Weed control prior to Crop Establishment | Flaxleaf fleabane, Conyza bonaneraxis | 2cm rosette-budding/early flowering | 4.3-5.6L/ha | Good coverage is essential for optimum weed control.  
Pre-planting:  
Cereals can be sown immediately after application. Sow cereal seed at least 5cm deep.  
Canola can be sown immediately after application of the 2.8L/ha rate. Delay seeding until 5 days after application of the 5.6L/ha rate.  
Sub clover, medic and lucerne - delay seeding until 5 days after application.

<th>SITUATION &amp; CROP</th>
<th>WEEDS CONTROLLED</th>
<th>STATE</th>
<th>RATE</th>
<th>CRITICAL COMMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vineyards and Orchards</td>
<td>Broadleaf weeds and grasses</td>
<td>All States</td>
<td>4-12L/ha</td>
<td>Apply when weeds are small and making active growth. Repeat application may be necessary in 6-8 weeks. Apply as directed spray to weeds only. Use higher rates for larger or more tolerant weeds.</td>
</tr>
<tr>
<td></td>
<td>Marshmallow, Common Storksbill</td>
<td>NSW, Vic</td>
<td>6-8L/ha plus 1-2L/ha Weedmaster® Due or Roundup Bicativ®</td>
<td>For improved control of tillered annual grasses. DO NOT apply as a spray near trees or vines less than 3 years old, unless they are effectively shielded from spray and spray drift. DO NOT allow spray or drift to contact green bark or stems, canes, laterals, suckers, fresh wounds, foliage or fruit.</td>
</tr>
<tr>
<td>Aquatic areas Drains and Channels; Margins of streams, lakes and dams</td>
<td>Cumbungi, Phragmites and Nutgrass</td>
<td>All States</td>
<td>2.3L/100L water</td>
<td>Apply during flowering period between January and May. Re-treatment of Nutgrass will be necessary.</td>
</tr>
<tr>
<td></td>
<td>Water couch</td>
<td>NSW, VIC, SA, TAS</td>
<td>4.5L/100L water</td>
<td>Apply as a single treatment between February and May. Apply in November to December with a further application at the same rate 6-8 weeks later.</td>
</tr>
<tr>
<td></td>
<td>Water Hyacinth</td>
<td>VIC</td>
<td>2L/100L water</td>
<td>Apply immediately prior to flowering.</td>
</tr>
<tr>
<td></td>
<td>Grasses and broadleaf weeds</td>
<td>NSW, Vic, Tas only</td>
<td>2-3L/ha plus 3.3-7.5L/ha Nu-trazine 600 or 2.2-5kg/ha Nu-trazine 900 DF</td>
<td>Apply the tank mixture not more than 2 weeks prior to planting. The addition of Weedmaster® Due or Credit® + Bonus® is recommended for improved control of grasses.</td>
</tr>
<tr>
<td></td>
<td>Tree pears (Opuntia spp)</td>
<td>QLD only</td>
<td>1mL injected into cuts at 3cm spacings around the lower trunks of mature plants</td>
<td>Apply a mix of 1 part Amitrole T in 25 parts water liberally to small plants and regrowth. Tree pears may take up to 12 months to die. Respraying may be necessary in some cases.</td>
</tr>
<tr>
<td></td>
<td>Fennel, Hoary cress, African Daisy, Apple of Sodom, Illyrian thistle</td>
<td>Vic, Tas, SA only</td>
<td>1.1L/100L water</td>
<td>Apply when weeds are actively growing, immediately prior to flowering.</td>
</tr>
<tr>
<td></td>
<td>Russian (creeping) Knapweed, Watsonia, Artichoke thistle, Prairie ground cherry, Onion weed, Khatiwed, Docks, Heliotrope, Chilean Censtrum (Green Censtrum), Oxalis (Soursob), Couch, Kikuyu, Fog grass, Sorrel</td>
<td>All States</td>
<td>1.1L/100L water</td>
<td>Apply when weeds are actively growing, immediately prior to flowering. Respraying will be necessary to destroy regrowth and seedlings.</td>
</tr>
<tr>
<td>Potatoes pre-harvest preparation</td>
<td>Ryegrass, Winter grass, Caperweed, Paterson’s curse</td>
<td>Vic, Tas only</td>
<td>5.5-11L/ha</td>
<td>Apply approximately 4 to 5 weeks before harvest after the potato haulms have dried off. Use the higher rates when ryegrass in clumps or other weeds more than 30cm high is present. For boom spraying apply at least 100L of spray mixture per hectare. If other broadleaf weeds such as Clovers, Variegated thistle and Cruciferous weeds are also present add Nufarm Estercide® Xtra 680 Herbicide. Warning: If used on sandy soils DO NOT plant follow-up crops within 3 months.</td>
</tr>
</tbody>
</table>

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD

ORCHARDS AND VINES: DO NOT APPLY LATER THAN 56 DAYS BEFORE HARVEST.

OTHER CROPS: NOT REQUIRED WHEN USED AS DIRECTED.
GENERAL INSTRUCTIONS
Before opening, carefully read Safety Directions, First Aid Instructions, Directions For Use, Storage and Disposal and Protection Statements.

RESISTANT WEEDS WARNING

Amitrole T Herbicide is a member of the triazole group of herbicides. Amitrole T has the inhibitors of carotenoid biosynthesis mode of action. For weed resistance management, Amitrole T is a Group Q herbicide.

Some naturally occurring weed biotypes resistant to Amitrole T and other Group Q herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Amitrole T and other Group Q herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Nufarm Australia Limited accepts no liability for any losses that may result from the failure of this product to control resistant weeds.

APPLICATION INFORMATION
Use recommended rates of Amitrole T in 100-500L of clean water per hectare using booms or directed nozzles. Use higher water rates for denser weed swards. When using knapsack equipment apply 900-1100L per hectare (1L/10m²).

MIXING INSTRUCTIONS
To improve the efficiency of Amitrole T, it is recommended that LI 700 or Activator® be added to the spray mixture at 0.1% (100mL/100L). LI 700 or Activator are not required when tank mixing with Nufarm Credit® + Bonus®, Weedmaster® Duo or Roundup Biactive®.

COMPATIBILITY
Amitrole T is physically compatible with the following products. Weedmaster® Duo, Credit® + Bonus®, Roundup Biactive®, Roundup CT, Roundup PowerMAX®, Amicide® 625, Nu-trazine 900DF, Nu-trazine 600, Simazine 900DF, Simazine Flowable, Diuron 900DF, Diuron Flowable, Nuquat®, 250, Propon®, Striker® and sulfofuron-methyl.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

Drift Warning
This product is a non selective herbicide and may damage crops, pastures and some ornamentals. However it is safer to use near plants susceptible to phenotype type herbicides. Spray drift may occur under adverse meteorological conditions or from certain spray equipment. DO NOT allow spray to drift onto sensitive areas including, but not limited to, susceptible plants/crops, cropping land, pasture, natural streams, rivers, wetlands or waterways and human dwellings.

Equipment Maintenance and Usage
DO NOT use the spray machine for any other purpose unless thoroughly cleaned by several rinsings of all parts with clean water.

STORAGE AND DISPOSAL

(15L)
Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Triple or preferably pressure rinse inner bladder before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean packaging to recycler or designated collection point. If not recycling, deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT bum empty containers or product.

(5L, 20L, 200L)
Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, triple rinse, break, crush or puncture and deliver empty packaging for appropriate disposal at an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. Empty containers and product must not be burnt.

Envirodrum 110 L Mini Bulk Returnable Container
Store in original sealed Envirodrum in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the Envirodrum with water or any other foreign matter. After each use of the product, please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Nufarm Australia Limited.

Refillable Containers (1000L)
Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

SAFETY DIRECTIONS
DO NOT inhale spray mist. After use and before eating, drinking or smoking wash hands, arms and face thoroughly with soap and water.

FIRST AID
If poisoning occurs, contact a Doctor or Poisons Information Centre Phone Australia 13 11 26.

MATERIAL SAFETY DATA SHEET
For further information refer to the Material Safety Data Sheet (MSDS), which can be obtained from your supplier or from the Nufarm website – www.nufarm.com.au

In case of emergency: Phone 1800 033 498 Ask for shift supervisor. Toll free 24 hours.
CONDITIONS OF SALE

"Any provisions or rights under the Competition and Consumer Act 2010 or relevant state legislation which cannot be excluded by those statutes or by law are not intended to be excluded by these conditions of sale. Subject to the foregoing, all warranties, conditions, rights and remedies, expressed or implied under common law, statute or otherwise, in relation to the sale, supply, use or application of this product, are excluded. Nufarm Australia Limited and/or its affiliates ("Nufarm") shall not accept any liability whatsoever (including consequential loss), or howsoever arising (including negligence) for any damage, injury or death connected with the sale, supply, use or application of this product except for liability which cannot be excluded by statute."
