READ SAFETY DIRECTIONS BEFORE OPENING OR USING
FOR ANIMAL TREATMENT ONLY

CLIK® SPRAY-ON
SHEEP BLOWFLY TREATMENT

Active Constituent: 50 g/L DICYCLANIL

For the protection of sheep, either off-shears or with any length wool, against fly strike (*Lucilia cuprina*) for 18 to 24 weeks.
For the protection of mulesing and marking wounds on sheep against fly strike (*Lucilia cuprina*) during the wound healing process.

5 LITRES / 20 LITRES

DIRECTIONS FOR USE

Restraints

1. DO NOT use on sheep which are producing or may in the future produce milk or milk products for human consumption.

2. DO NOT dilute.

3. DO NOT mix with any other product.

FOR THE PREVENTION OF POLL STRIKE (Diagram 1)

Rams and sheep susceptible to poll strike should be treated. Apply 5 mL of Clik Spray-On to the areas requiring protection, around the poll and horns.

FOR THE PREVENTION OF FLY STRIKE AFTER MULESING (Diagram 2)

Apply two bands, one over each side of the mulesing wound and overlapping 25 mm onto the surrounding wool.

Critical Comments

1. Use only a spray-on applicator gun recommended by Novartis.
2. Ensure the applicator gun is clean.
3. Calibrate applicator gun using an accurate volume measure.
4. Ensure all areas to be protected are treated.
5. When preventing body strike ensure bands overlap along the midline - see Diagram 1:

![Diagram 1]

6. When protecting mulesing wound from fly strike, take special care to treat the wound and the surrounding 25 mm of wool – see Diagram 2.

7. When protecting marking wounds from fly strike, take special care to treat the wound and surrounding wool – see Diagram 3.
8. This product is not recommended for treating existing strikes. Use a product registered as a dressing for existing strikes.
9. Heavy rain following the application of this product could diminish the period of protection.
11. Withholding periods must be observed following application of Clik for any purpose including after mulesing and/or marking as finite residues will occur.
FOR THE PREVENTION OF FLY STRIKE AFTER MARKING (Diagram 3)

- When a tail has been amputated, apply 4 mL over the crutch ensuring sufficient coverage of the open wound.
- When the tail has not been amputated, ensure sufficient coverage of the tail where the rubber ring has been applied.

In the case of ram lambs a further 4 mL can be sprayed over and around the scrotum area after the rubber ring has been applied.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.
GENERAL INSTRUCTIONS
CLIK Spray-On provides season length protection to sheep against body, crutch and poll strike and may be used either off-shears or on sheep with any length wool. CLIK Spray-On also protects mulesing and marking wounds on lambs against fly strike during the wound healing process. The dose volume is determined by the weight of sheep being treated. Apply CLIK Spray-On according to the diagrams and tables in the Directions for Use.

DO NOT DILUTE. Apply directly from the container or an appropriate back pack using a spray-on applicator gun recommended by Novartis.

CLIK Spray-On may be applied to all breeds of sheep to obtain protection against fly strike. CLIK Spray-On is applied as a low-volume treatment onto areas where protection is required. When applying Clik, the nozzle of the applicator gun should be high enough above the fleece (approximately 15-25 cm), to achieve a 15 cm wide band at each pass for protection of body strike. For treatment of mulesing wounds, the band must be wide enough to cover the wound and 25 mm onto the surrounding wool.

DO NOT apply during gusty or windy weather as spray drift may reduce the period of protection. It is good agricultural practice for mulesing/marking to be carried out at times of minimal fly activity. Reduced efficacy may occur in sheep affected with dermatophilosis.

WITHHOLDING PERIODS:
MEAT: DO NOT USE LESS THAN 28 DAYS BEFORE SLAUGHTER FOR HUMAN CONSUMPTION.
MILK: DO NOT USE ON SHEEP WHICH ARE PRODUCING OR MAY IN THE FUTURE PRODUCE MILK OR MILK PRODUCTS FOR HUMAN CONSUMPTION.
WOOL: DO NOT USE LESS THAN 3 MONTHS BEFORE SHEARING.

Note: The withholding period for meat applies only to meat destined for the Australian domestic market. Some export markets apply different standards which may require an export slaughter interval. If meat from the animal on which this product is to be used may be sold outside the Australian domestic market, details of overseas standards should be obtained prior to use of this product.

SAFETY DIRECTIONS
May irritate the eyes and skin. Avoid contact with eyes and skin. When opening the container and using the product wear elbow-length rubber gloves. Wash hands after use.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre (Phone 131126).

Material Safety Data Sheet
If additional hazard information is required, refer to the Material Safety Data Sheet. For a copy phone 1800 633 768.

Protection of Wildlife, Fish, Crustacea and Environment
Do not contaminate dams, rivers or streams with the product or used containers.
Disposal
Triple or (preferably) pressure rinse container and dispose of rinsate in disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Do not dispose of undiluted chemicals on-site. Break, crush or puncture and bury empty containers in a local authority landfill. If not available bury the containers below 500 mm in disposal pit as for rinsate. Empty containers and product should not be burned.

Storage
Keep out of reach of children. Store below 30 °C (Room Temperature). Protect from frost. Store in original container tightly closed in a dry, cool place. Do not store in direct sunlight. Do not re-use the container.
