EMBLEM®
FUNGICIDE

ACTIVE CONSTITUENT:  500g/L FLUAZINAM

GROUP 29 FUNGICIDE

For the control of white root rot in apples, club root of broccoli, brussels sprouts, cabbage, cauliflower and kohlrabi; Eutypa dieback and the pre-bud burst suppression of phomopsis cane and leaf blight in grapevines, and the control of late blight and sclerotinia in potatoes.

CONTENTS: 1-10 LITRES

Crop Care Australasia Pty Ltd, Unit 17/16 Metroplex Avenue, Murarrie Qld 4172
DIRECTIONS FOR USE

Restrains:
DO NOT apply with aircraft.

<td>Apples</td>
<td>White Root Rot (Rosellinia necatrix)</td>
<td>Qld, NSW, WA &amp; Tas only</td>
<td>50mL/100L</td>
<td>-</td>
<td>Pre-Planting: Prepare planting holes with a 30cm diameter to a depth of about 1 m. Remove all larger roots from the excavated soil. Apply 30L of a prepared suspension of EMBLEM and water per tree by mixing with the planting hole soil in the planting operation. Apply in 3 stages, adding 10L of the prepared suspension to each third of the excavated soil. Form a barrier of treated soil around each tree to contain the EMBLEM suspension and prevent other soil from contaminating the area around the tree.</td>
</tr>
<tr>
<td>Broccoli</td>
<td>Club root (Plasmodiophora brassicae)</td>
<td>All States</td>
<td>Seedling drench 25-50mL per 1000 plants</td>
<td>-</td>
<td>Use the high rate in fields where severe club root has occurred previously. According to the dilution table shown below, apply the required amount of the diluted mixture immediately after transplanting around the base of each plant to ensure thorough wetting of the collar region. This method of application is most suitable for use in soils with low infiltration rates. Apply in a minimum band width of 23cm along the planting row and incorporate to a soil depth of 15-20cm with a precision incorporator in the same operation. Apply in a water volume of at least 500L/ha. Disease control depends on protection of the taproot from infection. <strong>Note:</strong> This product may delay the start of harvest by up to 8 days and shorten the harvest period, without adverse effects on final yield.</td>

<tr>
<td>Grapevines</td>
<td>Phomopsis Cane and Leaf Blight ((Phomopsis , viticola))</td>
<td>All States</td>
<td><strong>Dilute Application</strong> 100mL/100L</td>
<td>-</td>
<td>Apply one application at 1 to 4 weeks prior to budburst after pruning to dormant spurs and/or canes. Mixing with 2% summer or winter oil may assist in coverage and penetration of the spray onto diseased wood. Adjust spray application equipment to thoroughly wet all one year old wood on the vines after pruning. Apply by dilute application spray equipment that only directs spray solution to the dormant canes and spurs on the cordons. Use of a fixed wand or short boom with single or multiple nozzles directing a narrow band of spray solution onto dormant buds, spurs and canes along the cordon wire(s) is recommended. When using orchard sprayers, ensure that only nozzles directing spray solution onto the dormant canes and spurs along the cordon wire(s) are operational. Follow the pre-budburst application of EMBLEM Fungicide with post-budburst applications (where required) of other products (e.g. dithianon or mancozeb) registered for the control of phomopsis in grapevines. Application of these products must be in accordance with the directions stated on the registered label of the product used.</td>
</tr>
<tr>
<td></td>
<td>Eutypa dieback ((Eutypa , lata))</td>
<td>All States</td>
<td></td>
<td></td>
<td>Apply as a dormant treatment to grapevines within 24 hours of pruning. Application should be made as a directed spray in a water volume that ensures thorough coverage of the pruning cuts.</td>
</tr>
<tr>
<td>Potatoes</td>
<td>Late blight ((Phytophthora , infestans))</td>
<td>All States</td>
<td>250mL/ha</td>
<td>14 days</td>
<td>Apply as a protectant fungicide treatment before late blight or sclerotinia becomes established in the crop. Early application before row closure is useful for the control of sclerotinia in potatoes. Apply in a spray volume of 250 to 500L/ha using nozzles that provide a medium droplet size and repeat at 7 to 10 day intervals. Use the shorter interval when wet conditions favour late blight development. If early blight (target spot) is present, include an appropriate fungicide for the control of this disease in the spray program such as Ace® Foliar Fungicide, Fortress® 500 Fungicide or Penncozeb® 750DF Fungicide.</td>
</tr>
<tr>
<td></td>
<td>Sclerotinia ((Sclerotinia , spp.))</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**
WITHHOLDING PERIODS:

HARVEST:
Apples, Broccoli, Brussels sprouts, Cabbage, Cauliflower, Kohlrabi, Grapevines: NOT REQUIRED WHEN USED AS DIRECTED.
Potatoes: DO NOT HARVEST FOR 14 DAYS AFTER APPLICATION.

GRAZING:
TREATED CROPS ARE NOT TO BE GRAZED OR FED TO ANIMALS.
DO NOT GRAZE VINEYARDS AFTER APPLICATION.

GENERAL INSTRUCTIONS

Fungicide Resistance Warning

GROUP 29 FUNGICIDE

For fungicide resistance management the product is a Group 29 fungicide. Some naturally occurring individual fungi resistant to the product and other Group 29 fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly. These resistant fungi will not be controlled by this product or other Group 29 fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, Crop Care Australasia Pty Ltd accepts no liability for any losses that may result from the failure of this product to control resistant fungi.

Mixing
Add the required amount of product to the partly-filled spray tank with the agitator in operation. Fill the tank with water, and continue agitation during spraying and after a stoppage.

Compatibility
EMBLEM is compatible with Ace, Fortress and Penncozeb 750DF, as well as a wide range of agricultural chemicals. A jar test with local water should be conducted before using any new tank mixtures with EMBLEM. For further information on compatibility please contact your local reseller or Crop Care Australasia Pty Ltd representative.

Application:

Dilute Spraying - Grapevines only

- Use a sprayer designed to apply high volumes of water up to the point of run-off and matched to the crop being sprayed.
- Set up and operate the sprayer to achieve even coverage throughout the crop canopy. Apply sufficient water to cover the crop to the point of run-off. Avoid excessive run-off.
- The required water volume may be determined by applying different test volumes, using different settings on the sprayer, from industry guidelines or expert advice.
- Add the amount of product specified in the Directions for Use table for each 100L of water. Spray to the point of run-off.
- The required dilute spray volume will change and the sprayer set up and operation may also need to be changed, as the crop grows.

RE-ENTRY PERIODS

Apples:
DO NOT allow entry into treated areas until the solution has dried on the soil surface. If prior entry is necessary wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), chemical resistant gloves and impervious boots. Clothing must be laundered after each day’s use.

Brassicas:
DO NOT allow entry into treated areas until the spray has dried. When prior entry is necessary, wear impervious footwear and if handling the treated crop wear cotton overalls buttoned to the neck and wrist, a washable hat and elbow length PVC gloves. Clothing must be laundered after each day's use.

Grapes:
DO NOT enter treated areas until the spray has dried after treating grapevines to perform low, medium and high exposure activities unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves. Clothing must be laundered after each day's use.
DO NOT enter treated areas for 7 days after treating grapevines to perform very high exposure activities such as grape girdling, unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves. Clothing must be laundered after each day's use.

**Potatoes:**
DO NOT enter treated areas until the spray has dried after treating potatoes, unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves. Clothing must be laundered after each day's use.

**PROTECTION OF LIVESTOCK**
DO NOT graze or feed treated crops to animals. DO NOT graze vineyards after application.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT**
Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product or used containers.

**PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS**
DO NOT apply under weather conditions, or from spraying equipment that may cause drift onto nearby plants/crops, cropping lands or pastures.

**STORAGE AND DISPOSAL**
Store in the closed, original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight.
Triple rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. Do not burn empty containers or product.

**SAFETY DIRECTIONS**
Harmful if swallowed. Will irritate the eyes and skin. Avoid contact with eyes and skin. Repeated exposure may cause allergic disorders. When opening the container and preparing product for use, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length chemical resistant gloves and goggles. When using the prepared spray wear cotton overalls buttoned to the neck and wrist and a washable hat and elbow length chemical resistant gloves. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, goggles and contaminated clothing.

**FIRST AID**
If poisoning occurs, contact a doctor or Poisons Information centre. Phone Australia 131 126. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

**MATERIAL SAFETY DATA SHEET**
Additional information is listed in the Material Safety Data Sheet which can be obtained from your supplier or from the Crop Care website: www.cropcare.com.au

**Conditions of sale**
Crop Care Australasia Pty Ltd will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply of these goods other than responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by Statutes applicable to the sale or supply of these goods. To the extent allowed by such Statutes the liability of Crop Care Australasia Pty Ltd is limited to the replacement of the goods or (at the option of Crop Care Australasia Pty Ltd) the refund of the price paid and is conditional upon a claim being made in writing and where possible sufficient part of the goods to enable proper examination being returned to Crop Care Australasia Pty Ltd within thirty days of delivery.
